Professional Summary

Highly driven leader and student bridging the gap between clients and technology. A full-stack web developer specializing in building, securing, and deploying custom software using well-known libraries and frameworks (React.js, Express.js, FastAPI) for clients and commissioned projects, supported by proficiency in Git version control for seamless team collaboration. Combines certified technical expertise with an extensive track record of spearheading large-scale organizational operations, managing technical projects, and directing various teams to deliver scalable, real-world solutions.
